huey wins DIMA 'best in show' award

The 10th annual DIMA Innovative Digital Product Awards were announced Saturday, February 25, at Sneak Peek 2006, in association with the PMA International Convention and Trade Show, the world's largest annual photo imaging trade show.

"huey exemplifies best of the best at this year's show. It received more total points than any other product in this year's award competition," said Chad Munce, group executive, Digital Imaging Markets for the Photo Marketing Association. "The DIMA Awards recognize products that are on the cutting-edge of innovation and huey is clearly on target."

In less than five minutes, huey can calibrate a user's monitor and adjust it based on his or her primary viewing activity – viewing photos, playing games, creating graphics or browsing the Web. With an affordable price tag, huey delivers accurate on-screen color, a crucial component for anyone who cares about color fidelity.

PANTONE® huey

Designed for calibrating and profiling all types of monitors – LCD and CRT. Each individual package includes a huey measurement device (emission only colorimeter) with ambient measurement capabilities, and software for monitor calibration.

huey corrects the color on your monitor so photos and designs print more accurately, game graphics are more intense and movies are more true-to-life. Easy-to-use right out of the box, huey adapts your monitor for changing room lighting and applies your personal preferences for viewing accurate color all of the time.

System Requirements:

- CRT and LCD Monitors
- Windows® 2000 and XP
- Mac OS X 10.3 or higher
- USB port
